AGRC is currently working on revising a polygon feature class that approximates the boundaries of each local address coordinate system (ACS) and each quadrant (NE, NW, SE, SW) within each local ACS. The feature class should be available by the end of January.

As we compile notes on local coordinate systems, we'll post them here. If you have information or corrections to contribute, please post them here as a comment or email [bgranberg@utah.gov](mailto:bgranberg@utah.gov).

Please note, this is a work in progress.

## Duchesne County

(compiled by: James Wingate, Blue Stakes)

Municipalities with their own address origins:

- Duchesne &ndash; intersection of Main St (0 N/S) and Center St (0 E/W)
- Myton &ndash; intersection of Main St (0 N/S) and Center St (0 E/W)
- Roosevelt &ndash; intersection of Lagoon St (0 N/S) and State St (0 E/W)

Municipalities that count from Unincorporated County address origin located at: Intersection of South Cove Rd/US 40 [200 N Roosevelt] (0 N/S) and State St (0 E/W) in Roosevelt

- Altamont
- Tabiona

The unincorporated county origin covers all of Duchesne County except for the areas within Duchesne City, Myton and Roosevelt city boundaries. A significant portion of Uintah County also counts from this origin, including the municipality of Ballard Town and roughly 25% of the unincorporated area.

Roosevelt City grid and County grid both have same 0 E/W, but their 0 N/S locations differ by two blocks. This can be slightly confusing, as evidenced by traveling north along State St in Roosevelt. Proceeding north from Lagoon St, after a few blocks you will hit 500 N (City), then 600 N (City) and then 500 N (County). This is because the county origin begins two blocks farther north than the city origin.
